FCSC ADMIX CG IS SYNTHETIC EMULSION BASED LIQUID ADMIXTURE FOR USED IN PLACE OF WATER TO IMPROVE THE QUALITY OF CEMENT GROUTS. IT IS IDEAL FOR INTERIOR AND EXTERIOR TILE JOINT FILLING APPLICATION AND IMPROVES WATER ABSORPTION RESISTANCE, ENHANCES FLEXIBILITY & DURABILITY TO HAVE BETTER PERFORMANCE.

## APPLICATION PROCEDURE

### SUBSTRATE PREPARATION

- Joints must be clean, dry and free of dust.
- Ensure 24 hrs time interval for grouting after tile fixing.
- Emptied 2/3 of the tile thickness depth.
- Put masking tape by side of the grouting space if required.

- Shake the bottle before use
- Take Admix CG in to a bucket and add the FCSC Tile Glue in mixing condition with slow speed mixture to avoid unwanted air incorporation.
- Make sure the mixture should be uniform colour and lumps free.
- Wait 2-5 mint and remix.
- Use the paste within 60 minutes from mixing.

- Use hard rubber grout floater and press the firmly to the joint.
- Hold the floater at 90° angle and pull it diagonally at 45° angle.
- Work in small areas to have better control on removing the excess grout from joints and surface by moving the squeeze diagonally to the grout lines.
- Ensure that joint is filled completely, and grout is not just sitting on top.

- Clean off the surplus grout from tile joints and tiles within 30-45 minutes/ before the product dries.
- Initially use a rough textured sponge dampened with water to remove the grout residue.
- Use the damp sponge in a circular motion and keep it relative to the tile surface to achieve the flush joint & taking care not to drag grout from the joints.
- Clean off any light residue of tile grout left on the tile surface using an alkaline detergent/ Tile Cleaner AC without disturbing the joint finish.
- Tools and containers should be cleaned using clean water when the grout is still fresh.

## FORMULA FOR THE COVERAGE CALCULATION

$$C = 1.75 \times H \times T \times [(L + W) / (L \times W)]$$

C - Tile grout coverage (kg/m<sup>2</sup>)

H - Thickness of tile (mm)

T - Width of joint (mm)

L - Length of tile (mm)

W - Width of tile (mm)
